

Shortgrove Conservation Area Appraisal

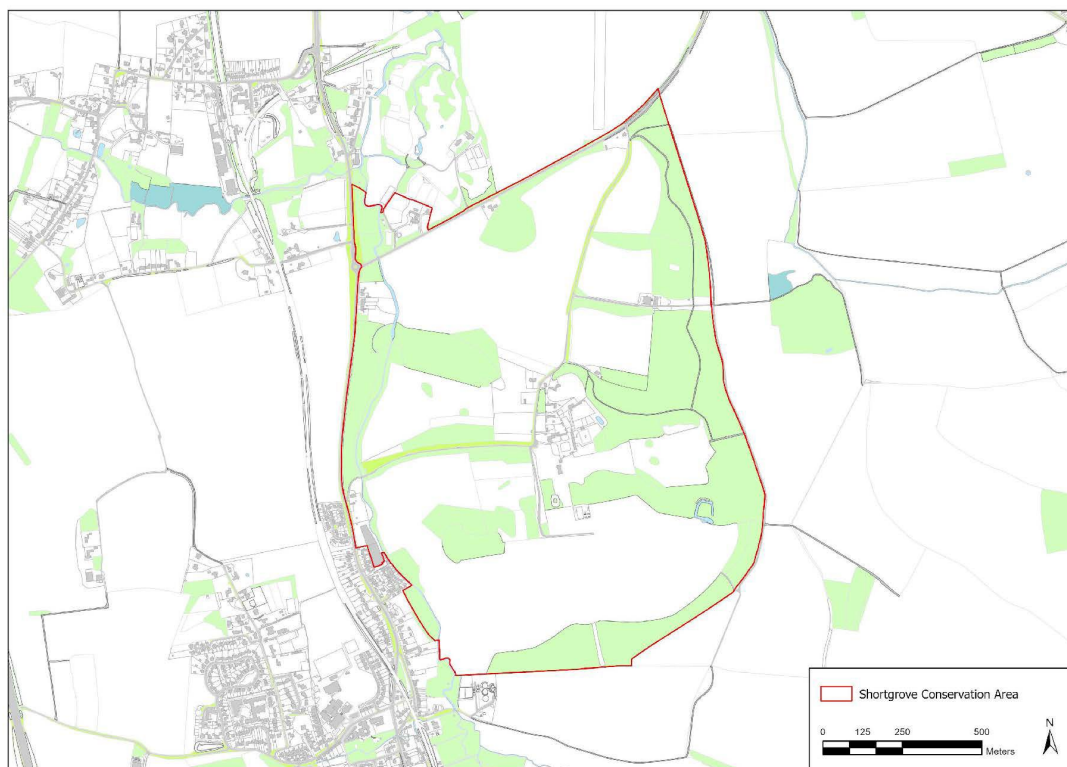

We are consulting on a proposed new conservation area for Shortgrove.

We have received a proposal to designate the Shortgrove Conservation Area due to its historic interest as the former parkland to Shortgrove Hall.

Extent

A conservation area appraisal looks at the character, appearance and special interest of a conservation area or group of conservation areas.

The proposed conservation area boundary largely follows the line of the Shortgrove Hall Registered Park and Garden, but also includes a group of dwellings at its north-western edge. These include 1 and 2 Sparrows End, a pair of Grade II listed cottages. The road and grass verge at the northern edge of the park, Sparrowhill End, is also proposed for inclusion within the boundary of the conservation area, taking in Shortgrove Bridge which crosses the River Cam and forms part of the road.

Appraisal

The appraisal also includes a history of the area, assessment of significance and suggested management proposals to address several issues identified by the document.

There are 7 listed buildings or other structures within the area. The appraisal identifies 5 additional heritage assets which make a positive contribution, and which may be considered for local listing in the future.
